This is a deep-field astronomical image in the R+F660+I filter. The image shows a dark sky with several faint, diffuse sources. A prominent, bright, multi-colored source (white/yellow at the center, transitioning to red and purple) is located at approximately RA 23.2s and Dec -72.9°. To its left, at RA ~25.8s, there is a faint, purple-tinted source. A horizontal white scale bar at the bottom indicates a length of 20 arcseconds. The axes are labeled with J2000 equatorial coordinates: Right Ascension (RA) and Declination (Dec).
