This astronomical image displays a deep field in the R+F660+I color bands. The central region is highlighted by a yellow rectangle, indicating a primary source of interest. The image includes a scale bar in the bottom right corner, representing 20 arcseconds. The axes are labeled with Right Ascension (RA) and Declination (Dec) in J2000 equinox coordinates. The RA axis ranges from approximately 0h51m57s to 0h52m01s, with major ticks at 0h52m00s, 51m58s, and 56s. The Dec axis ranges from approximately -73°20'25" to -73°20'15", with major ticks at -73°20'20", 30", and 40". The image shows several other sources, including a bright cyan/white source at the center of the yellow rectangle and several magenta/pink sources scattered throughout the field.
